

THE INSTITUTE OF PAPER CHEMISTRY
APPLETON, WISCONSIN

November 24, 1947

Dear Dr. Lederberg:

Your letter of November 18 has been received, and I would like to aid your interesting work as much as possible. Although I have had some quantity of the materials you mention, my present supply is about exhausted. I can supply you with one or more grams of the following materials, fairly pure, but not of the highest purity:

methyl α - glucoside
methyl α - galactoside
methyl β - galactoside

Perhaps Dr. Nelson K. Richtmyer of the National Institute of Health could help you with some of the other materials desired.

If you are interested in melibiose and raffinose (both α - galactosides), I could supply you with several grams of each. We also have some methyl α - mannoside.

Please let me know your wishes in the matter, and I will do my best to assist you.

Sincerely yours,

Ward Pigman
